Race meeting app for other clubs: hosted by WDTC

Nov 20, 2026 · @Duncan

Waiheke Dirt Track Club will host the live scoring app we use on race day for your club, in its own private folder, for a small annual fee. You supply your classes, cars and programme; we keep it running.

What your club gets

A web app that runs your race day from a phone or laptop. Spectators and drivers see the programme, grids, results and points live. One or two officials score. It has been used at Waiheke Dirt Track Club meetings and our 40th Anniversary weekend.

- **Live schedule:** what is on now, what is next, with a banner for announcements.
- **Grids and results:** marble draw, reversed second heat, reverse-split third heat, features in points order. Results update on every phone within 15 seconds.
- **Scoring from a dropdown:** the scorer picks cars in finishing order from your car list, or types a number.
- **Your classes and points:** your own class names, codes and points scheme (5-4-3-1 or 2-1-1).
- **Season table:** per-class points across meetings, with a best-N-meetings rule you choose.
- **A programme you edit yourself:** add, move or remove races, rounds and breaks.
- **New meeting in a minute:** copy the cars and programme from your last meeting.

How hosting works

Each club gets its own folder and its own link, for example `wdtc.nz/yourclub`. Your PIN, cars, meetings and results are kept separately from every other club, and no club can see or change another's.

- **Two links:** a scorer link for your officials (ends in `#score`) and a spectator link for everyone else, which you can print as a QR code.
- **Your PIN:** you choose it, and only your officials know it. Anyone with the spectator link can watch but not change anything.
- **Backups:** the app keeps an hourly backup and a log of every change, so a wrong button can be put right.

- **No accounts to manage:** no logins, no software to install. It runs in a phone or laptop browser.

Costs

These fees are here. Amounts are in NZ dollars.

Item	Proposed fee	What it covers
Setup	NZ$100, once	Your folder, your PIN, your classes and cars loaded, a first-meeting walk-through
Annual hosting and support	NZ$200 a year	Hosting, backups, updates, and help on the phone or by message
Race-day support	Included	A named contact for your first two meetings
Custom changes	By quote	Special rules or features beyond your class list and programme

A club that already has its own website hosting can instead run the app itself. We supply the files and a set-up guide. Support is limited to the app and not the hosting. The club is responsible for uploading new versions of the app.

Getting started

1. **Tell us about your club:** name, your classes with short codes (for example SA, B, C), and how you award points.
2. **Send your cars:** a list with number, driver and class. A spreadsheet is fine, and numbers can include letters (5WI).
3. **Send last season's programme:** the order of races on a normal race day.
4. **We set up your folder** and send your scorer link, spectator link and PIN.
5. **Practice run:** your scorer enters a mock meeting with us on a call. Plan 45 minutes.
6. **First meeting:** we are on call for it. Keep paper results as a backup for the first one or two meetings.
7. **After each meeting:** copy the meeting for the next date, and update cars as they change.

Support and updates

- **Race day:** a phone number and message contact for your officials, during racing hours, for your first two meetings. After that, support is by message, with a reply the same day.
- **Between meetings:** questions about classes, programmes and the season table, by message.
- **Updates:** improvements are added for all clubs together, outside race days. We tell you before a change that affects scoring.
- **Scorer cheat sheet and guide:** every club gets the one-page scorer cheat sheet and the "if something looks wrong" card.

The app shows an orange bar on any phone that loses signal, with the time of the data it is holding, so spectators can tell when their screen may be out of date.

Data, privacy and terms

- **Your data is yours.** Your cars, drivers and results belong to your club. We can export them for you at any time, and delete them if you leave.
- **What is shown publicly:** car numbers, driver names, classes and results. Do not enter anything else about people, such as phone numbers or addresses, and do not enter details of children beyond what the club already publishes.
- **Your responsibility:** your club is responsible for what it enters and for getting each driver's agreement to be listed.
- **As is:** the app is provided as is, with no guarantee it will always be available. Keep paper results as a backup on race day.
- **Leaving:** you can stop at any time. We will send your data on request and remove your folder.

What it does not do

- It does not take entries, payments, or driver sign-on. It scores and shows the meeting.
- It does not handle timing, lap counts or transponders.
- It has one PIN per club, not a separate login for each official.
- Special race types, such as the best-of-the-rest saloon feature, follow WDTC's rules and class codes. A different rule needs a custom change.
